
SITE SURVEY – QUESTIONNAIRE

This questionnaire will help the MIX Networks team to directly support the successful onboarding and conversion of a pilot site.

The goal of the questionnaire is to understand how the sites are using the existing POTS lines and how to configure the MIX Networks solution for a successful deployment.

Questions:

Existing installation:

1. Site location
2. On-site contact in case of emergency
3. Number of existing POTS line(s)
4. Purpose of the existing POTS line(s)
5. Equipment communicating via the existing POTS line(s)
6. Configuration of the equipment communicating via the existing POTS line(s)
7. Number of calls made per day

Pilot installation:

1. Physical location where the MIX Networks solution will be installed
2. FSR contact who will be performing the installation
3. AC/DC Power requirements
4. WAN failover requirements
5. Cellular Provider
6. Equipment connected to the WAN ETH port of the MIX solution
7. Equipment connected to the LAN ETH port of the MIX solution
8. Cellular signal survey at the location of the MIX solution
9. Wi-Fi signal survey at the location of the MIX solution
10. Network topology drawing & IP plan
11. Phone Line(s) porting
12. SIP line(s) provider
13. SIP line(s) mode (Voice, Modem, Data, Alarm, Fax)
14. Remote management requirements
15. Alerts and Monitoring requirements
16. MIX Networks emergency contact

Current Installation	
Site location	
On-site contact in case of emergency	
Number of existing POTS line(s)	
Purpose of the existing POTS line(s)	
Equipment communicating via the existing POTS line(s)	
Configuration of the equipment communicating via the existing POTS line(s)	
Number of calls made per day	
Installation	
Physical location where the MIX solution will be installed	
FSR contact who will be performing the installation	
AC/DC Power requirements	
WAN failover requirements	
Cellular Provider	
Equipment connected to the WAN ETH port of the MIX solution	
Equipment connected to the LAN ETH port of the MIX solution	
Cellular signal survey at the location of the MIX solution	
Wi-Fi signal survey at the location of the MIX solution	
Network topology drawing & IP plan	
Phone Line(s) porting	
SIP line(s) provider	

SIP line(s) mode (Voice, Modem, Data, Alarm, Fax)	
Remote management requirements	
Alerts and Monitoring requirements
