

Transform Your Microsoft Teams with **MIX Networks® Hosted PBX**

Bridge the Gap Between Teams Collaboration and Enterprise Telephony

Your Microsoft Teams investment is powerful, but Teams Calling has critical limitations that impact business operations:

- NO Complex Hunt Groups
- NO Fax Support
- NO Contact Centers
- NO Analog Endpoints

The MIX Networks® Solution:

Full PBX Power Inside Teams

Advanced Softphone Integration

Experience the most sophisticated softphone available, built directly into your Teams interface:

- **Satin Codec** - Microsoft's proprietary next-gen codec for superior call quality
- **Advanced Noise Suppression** - Crystal-clear conversations anywhere
- **Universal Platform Support** - Seamless desktop, mobile, and web experience
- **Enhanced Mobile Integration** - Superior functionality vs. standard Teams calling

Enterprise-Grade Features Teams Can't Provide

Access all the advanced telephony capabilities your business demands:

- **Complex Hunt Groups** - Sophisticated call routing
- **Full Fax Integration** - Send/receive fax through Teams
- **Advanced Contact Center** - Complete call management
- **Analog Device Support** - Connect legacy hardware
- **Multiple Direct Routes** - Built-in redundancy for maximum uptime

Seamless Management

Our advanced SIP management integrates seamlessly with your existing O365 environment, ensuring no disruption to current workflows while providing centralized control over all communication features.

✓ Ideal for:

- **Microsoft Power Users** - Maximize your ecosystem investment
- **Schools & Government** - Meet complex communication requirements
- **Mobile Workforces** - Superior mobile integration across all platforms

Why MIX Networks®?

MIX Networks delivers a purpose-built solution designed specifically for Teams integration, providing enterprise-grade reliability with built-in redundancy while being cost-effective—giving you advanced PBX features without replacing your existing Teams investment.
